

RIVERS EDGE CATTLE COMPANY & SPITTOON RANCH 2ND ANNUAL FALL BULL SALE

DECEMBER 12, 2017

70 Angus & Sim Angus
2-Year-Old Virgin Bulls

12:30 PM (MST) - Gordon Livestock Auction - Gordon, NE

2ND ANNUAL FALL BULL SALE

will be able to cover more cows than yearling bulls, as well as having a chance to adapt to your ranch well before the breeding season. And, last but not least, remember the Section 179 tax deduction for bull purchases as the year comes to a close.

We are grateful to be in the cattle business and to have a chance to work with some the best cattlemen and women in the world. Thank you for your support and we hope to see you December 12th.

Seth, Courtney, and Oakley Terrell

708 SHELTON ST. · CHADRON, NE 69337 · 308-430-0705

WWW.RIVERSEDECATTLE.COM

Welcome to the 2017 River's Edge Cattle Co. and Spitoon Ranch, Inc. fall bull sale. Mindy and I would like to thank our family and friends for all the help and support throughout the year. Partnering with Seth and Courtney Terrell has been a very positive venture for us. Quality cattle that raise pounds and performance while being structurally sound with good disposition are something both ranches strive for. River's Edge Cattle Co. and Spitoon Ranch bulls are available to view at any time at both ranches.

We are very proud of our Spitoon Ranch registered cows. Our oldest cows will turn 8 this coming spring and have raised us very productive cows and bulls in the last 6 years. We stress performance, strong maternal ability, and calving ease in our program to have trouble-free offspring that pop in growth after calving and continue all summer. The bulls we have to offer are backgrounded after weaning with DDG and hay until spring, then put on grass in April. They didn't come in off grass until November 1st. Spitoon Ranch bulls will make it in the real world.

Fortunately, this year has shown better stability in cattle market prices. New government in place may be better suited for our industry, only time will tell. Quality pounds always sell and the bulls that we have to offer will give you just that. We would like to thank our previous buyers for your support in our program. So, come join us early on December 12th at 12:30 pm at Gordon Livestock to view the bulls and enjoy a meal before the sale!

Thank you,
Matt & Mindy Peters

SALE INFO

RIVERS EDGE CATTLE CO. & SPITTOON RANCH INC. BULL SALE

December 12, 2017 • 12:30 PM MST

Gordon Livestock Auction • 108 Foch Street • Gordon, NE • 308-282-1171 • www.gordonlivestock.com

RIVERS EDGE BULLS LOCATION

The bulls can be viewed until Dec. 11 at the ranch south of Hay Springs. Take Hwy. 87 south 13 miles. The bulls will be next to the highway at mile marker 31 on the east side.

SPITTOON RANCH BULLS LOCATION

The bulls can be viewed until Dec. 11 at the ranch 4 miles south of Clinton on 270th Ln.

AUCTIONEER

Kyle Layman - 785-421-3441

TERMS AND CONDITIONS

All bulls sell under the Standard Terms and Conditions established by the American Angus Association.

GENETIC DEFECT GUARANTEE

None of the bulls in the River's Edge Cattle Co. and Spitoon Ranch offering will be carriers or potential carriers of Arthrogryposis Multiplex (Curly Calf), Neuropathic Hydrocephalus, or Fawn Calf (CA).

FERTILITY

All bulls will pass a breeding soundness exam prior to the sale.

STORM DATE

If inclement weather is a concern, please contact Matt, Seth, either web site, or Gordon Livestock for any changes.

SIGHT UNSEEN WARRANTY

If you are unable to attend our sale and wish to purchase a bull, please contact us. On sale day we will assign someone to evaluate your bull and represent your bid during the sale. Your bid will remain confidential and be handled professionally. If for any reason you don't like the bull, we will take him back. No questions asked, full refund.

DELIVERY OPTIONS

Option 1: Take your bull home the day of the sale or the Wednesday after the sale and receive \$200 off the purchase price of each bull.

Option 2: We will feed the bulls and deliver them to you (free up to 250 miles) beginning April 1.

Option 3: We will feed the bulls for you until you are ready for them. You will be billed for feed at a rate of \$2.00 per day, per bull after April 15. You will be responsible for picking up your bulls.

FIRST BREEDING SEASON GUARANTEE

All bulls selling for over \$3,000 are sold with a first year breeding season guarantee (90 days after turnout). If a bull is deemed unusable, the purchaser will be given credit for 50% of the price of the bull minus salvage value. All notices must take place prior to September 1, 2018. This is not a mortality insurance policy, nor does it cover mismanagement or neglect. We do not cover injuries sustained prior to breeding season if your bull is turned out with other bulls.

- Outcross SimAngus genetics: No Legacy or Shear Force
- Substance has produced some long necked, deep sided calves for us
- His dam is a very deep bodied 7-year-old that raised another good one this year

DATA DEFINITIONS

EXPLANATION OF \$VALUES

In this catalog, we have listed the basic EPDs as well as the \$Wean and \$Energy values. Below is an explanation of the values. We feel that commercial cow/calf producers should focus more on these traits. Cow feed costs are the single largest cost in any operation. Why don't we as an industry focus on cattle that can wean great calves on less feed due to moderate, mature sizes and adequate, but not excessive, milk? Extra cow size and extra milk is not free.

COW ENERGY VALUE (\$EN)

A Cow Energy Value (\$EN) is available to assess differences in cow energy requirements, expressed in dollars per cow per year, as an expected dollar savings difference in future daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

If Cow A has a \$Energy Value of +17.89, and Cow B has a Value of +4.34, the estimated difference in feed costs would be 13.55. Now if you use bulls with those values and retain females out of them, how many dollars would be the difference to you?

WEANED CALF VALUE (\$W)

Weaned Calf \$Value (\$W) quantifies four primary economic impact areas:

1. Birth Weight - birth weight influences on calf death losses related to dystocia, weaned calf crop percentage, and resulting revenue per cow.
2. Weaning Weight - direct growth impact on weaning weight revenue (pre-weaning growth and pounds of calf sold) and energy requirements and related costs necessary to support pre-weaning calf growth.
3. Maternal Milk - revenue from calf pre-weaning growth and pounds of calf sold as influenced by varying cow milk levels, and costs related to lactation energy requirements.
4. Mature Cow Size - expense adjustments are made for maintenance energy as related to differing mature cow size, including mathematical linkages between mature weight & yearling weight.

The impact areas are combined into a bio-economic value expressed in dollars per head assigned to Angus genetics from birth through weaning.

\$Values only have meaning when used in comparing the relative merit or ranking of two individuals. \$W provides the expected dollar-per-head difference in future progeny pre-weaning performance in a multi-trait fashion, within a typical U.S. beef cowherd. If Bull A has a \$W of +25.00 and Bull B has a \$W of +15.00, and these sires were randomly mated to a comparable set of females and the calves were exposed to the same environment, and a normal number of replacement females were saved from both sires, on average you could expect Bull A's progeny to have a +10.00 per head advantage in pre-weaning value over Bull B's progeny ($25.00 - 15.00 = +10.00$ per head). As with any \$Value, \$W only has meaning when used in comparing the relative merit or ranking of two individuals.
